Measuring A Wild Turkey With Multiple Beards

All measurements on the Turkey are done in 1/16 increments. The SCI measuring system does not include the weight of the turkey when calculating the final score, weight can not be re-measured and therefore is listed as supplemental information.

Measuring the Spurs: Both the right and left spurs are measured. The measurement should begin at the center point of the spur that has been dissected off from the leg at a 90 degree angle to the base of the spur. Hold the cable tightly and continue measuring by following the curvature of the spur to the tip. This measurement can be taken from the left or right side of the spur; however, it may not be taken from the top or the bottom of the spur. The measurement will be multiplied by 10 to establish the total score of each spur.

Measuring the Beard: A beard must be measured from the base (thickest area attached to the chest) to the tip or longest feather in the beard. Use a multiplier of 2 (ex: 8-8/16 x 2 = a total score of 17) to receive the total score for the beard.

Add together the total points of the spurs, and length of the beard.

US Currency only. Credit Cards Preferred. Entry fees are valid for 12 months from date of form located in the lower right hand corner.

Measuring A Wild Turkey With Single Beard

All measurements on the Turkey are done in 1/16 increments. The SCI measuring system does not include the weight of the turkey when calculating the final score, weight can not be re-measured and therefore is listed as supplemental information.

Measuring the Spurs: Both the right and left spurs are measured. The measurement should begin at the center point of the spur that has been dissected off from the leg at a 90 degree angle to the base of the spur. Hold the cable tightly and continue measuring by following the curvature of the spur to the tip. This measurement can be taken from the left or right side of the spur; however, it may not be taken from the top or the bottom of the spur. The measurement will be multiplied by 10 to establish the total score of each spur.

Measuring the Beard: A beard must be measured from the base (thickest area attached to the chest) to the tip or longest feather in the beard. Use a multiplier of 2 (ex: 8-8/16 x 2 = a total score of 17) to receive the total score for the beard.

Add together the total points of the spurs, and length of the beard.

Species of Turkey Check One

- Eastern Gould's Merriam's Osceola
 Ocellated Rio Grande European South Pacific
